

Build intelligent systems that listen, understand, act, and learn.

Founder Strategy 2026 V2
Revenue is the first packaged system — not the limit of
the company.

The market is real. The gap is orchestration.

Common Room, Clay, and Unify validate the category: signals, enrichment, agents, and activation are converging. The open space is not “more intent data.” It is turning messy signals into trusted decisions and action inside a client’s actual workflow.

Validated demand

Platforms already sell always-on signals, identity resolution, enrichment, and outbound activation.

Implementation gap

Teams still struggle with trust, context, workflow fit, and production governance.

Sonar wedge

A lean, managed intelligence system that connects the pieces without enterprise platform cost.

Listen. Pulse. Learn.

Sonar is a closed-loop intelligence system. One mode listens for market movement. One mode deliberately pings the market. Both feed the same intelligence core.

We start with revenue because timing has immediate economic value.

The first packaged system listens for buying windows and activates the right response. The same architecture can later power other strategic workflows.

DEPLOY SONAR

Install an always-on signal-to-revenue system inside the client's existing stack.

DELIVERY LOOP

Discover → Design → Build →
Operate → Improve

BUILD WITH SONAR

Custom AI systems for high-value workflows once revenue creates proof and cash.

The company operating system.

VISION

Build intelligent systems that listen, understand, act, and learn — starting with the systems that create revenue.

VALUES

Truth Over Noise

Courage to Disrupt

Intelligent Leverage

METHODS

Listen → Understand →
Act → Learn

Sell reality. Build toward
vision.

Solve once. Systemize
forever.

OBSTACLES

Losing focus in a massive
opportunity

Overbuilding before proof

Getting trapped in custom
labor

MEASURES

\$10K MRR by Jul 31

**\$25K base / \$40K stretch
by Dec 31**

3 reusable systems

2 credible case studies

One clear wedge. One strategic expansion path.

DEPLOY SONAR

Revenue teams buy a managed system that listens for market movement and runs directed activation around ICP, account signals, CRM history, and timing.

- Signal architecture + data sources
- Context, scoring, and “why now” logic
- Research agents and message inputs
- CRM tasks, alerts, sequences, and reporting
- Managed monitoring and improvement

BUILD WITH SONAR

For trusted relationships and high-value workflows beyond GTM: proposals, onboarding, research, reporting, customer success, or operational coordination.

- Workflow diagnosis and redesign
- Custom agents and integrations
- Human approvals and governance
- Ongoing operating support
- Reusable system components

Price the system, not the agent.

Buyers should not think about tokens, debugging, infrastructure, or agent count. They should buy a working workflow with scope, monitoring, and outcomes.

Architecture Sprint

\$7.5K–\$15K
2–4 weeks

Map the workflow, data, signals, play logic, and launch path.

System Deployment

\$15K–\$50K+
Setup / implementation

Connect tools, agents, CRM, scoring, routing, activation, reporting.

Managed Operation

\$4K–\$10K/mo
Scope-based

Monitor, maintain, optimize, and improve the workflow.

Start where the pain is visible and budgets exist.

TARGET

Founder-led B2B SaaS and tech-enabled services

20–150 employees

\$15K+ ACV

Existing CRM + outbound stack

Inconsistent pipeline

TRIGGER CONDITIONS

New revenue leader

SDR / AE / RevOps hiring

Funding or expansion

Product / market launch

Dormant CRM activity

WHY NOW

They can pay, decide quickly, already have tools, and feel the gap between activity and intelligent execution.

A thin complete loop beats a giant unfinished platform.

Every client build should share one reusable model: Account → Person → Signal → Context → Score → Play → Action → Outcome.

TIAGO DEFINES

What the signal means, why it matters, and what commercial action should follow.

LUCAS BUILDS

How the system senses, reasons, acts, logs, and improves reliably.

Two founders. Agents and VAs where leverage compounds.

TIAGO — GTM STRATEGY

- Positioning
- Founder-led sales
- Discovery + offers
- Client strategy
- Messaging
- Revenue accountability

AI + AUTOMATION

- Monitoring
- Research
- Enrichment
- Scoring
- Personalization
- Routing
- Reporting

LUCAS — GTM ENGINEER

- Product architecture
- Agents + workflows
- Integrations
- Reliability
- Website + infra
- Technical delivery

Rule: human judgment stays where it creates leverage; repeatable execution moves into systems.

Base case beats fantasy. Stretch case keeps pressure.

\$10K

MRR by July 31

\$25K

base MRR by Dec 31

\$40K

stretch MRR by Dec 31

\$100–200K

implementation / project cash
collected by year-end

- 50–65% gross margin during early custom deployments
- 70%+ margin after repeatable workflows stabilize
- 40–60% of repeatable execution automated by year-end
- 3 reusable signal/workflow systems
- 2 credible client case studies

The market is big enough. The danger is losing the wedge.

RISK 1

Becoming "lead gen with AI."

Guardrail: never sell volume. Sell timing, context, prioritization, and system outcomes.

RISK 2

Becoming generic AI consulting.

Guardrail: revenue remains the repeatable wedge; custom systems are selective and relationship-led.

RISK 3

Overbuilding before proof.

Guardrail: build one thin complete loop around a paying client before expanding platform scope.

Sell the first deployment. Build the first loop. Extract the first reusable system.

Sharp. Human. Built to hear what others miss.

Modern, calm, precise, and lightly irreverent.
No AI-bro cosplay. No military theater. No jargon soup.

Intelligent systems that listen, understand, and act.

MASTER BRAND: Sonar turns noise into context, context into action, and action into measurable outcomes.
REVENUE WEDGE: Find the signal. Move when it matters.

PERSONALITY

Sharp
Calm
Curious
Commercial
Lightly irreverent
Premium without being stiff

PROMISE

Better timing
Clearer context
Explainable prioritization
Smarter action
Less manual friction
Systems that improve

THE ENEMY

Noise
Static lists
Fake personalization
Tool sprawl
Empty AI hype
Volume worship

Abyss Minimal: depth, clarity, one warm pulse.

ABYSS NAVY

#071A2B

Primary dark / atmosphere

SIGNAL BLUE

#1CB7FF

Primary signal / action

PULSE CORAL

#FF6B57

Warm accent / moments that matter

POLAR WHITE

#F7FAFC

Primary light / clarity

SONAR SILVER

#B8C4CE

Neutral / secondary information

GRAPHITE

#334452

Body copy / operational detail

Sora for conviction. Inter for clarity.

SORA BOLD / EXTRABOLD

Hero statements
Slide titles
Category language
Campaign headlines

Decisive. Geometric. Modern.

INTER REGULAR / MEDIUM

Body copy
Labels
Bullets
Captions
Docs and operational material

Readable. Neutral. Precise.

SLIDE SCALE • Hero 52–64 pt • Title 34–40 pt • Section 24–28 pt • Body 18–22 pt • Labels 12–14 pt

Bold without being loud. Smart without performing intelligence.

SAY THIS

Signal-based intelligence
Buying windows
Commercial relevance
Explainable action
Human-guided systems
Move when timing matters
Built around the workflow

AVOID THIS

AI SDRs
Unlimited agents
Guaranteed meetings
Replace your team
Crush quota
Dominate your market
10x everything

Signal, not warfare. Movement, not clutter.

USE

Waves
Echoes
Pulses
Concentric rings
Data currents
Negative space
One active signal point

AVOID

Crosshairs
Weapons
Submarines
Military maps
Robot faces
Crypto / hacker clutter
Busy dashboards

APPROVED LINES

Find the signal. Move when it matters.

Pipeline starts before the reply.

More activity is not more intelligence.

Stop working the whole ocean.

RULE: Dark slides create atmosphere. Light slides explain. Every slide earns its space.
